## ***What is Global Science and Technology Week?***

The Office of Science and Technology Policy of the Executive Office of the President has joined with representatives from over 27 public and private organizations to develop activities for this year's Global Science and Technology Week (GSTW). The theme of GSTW 2002 is *"Science and Technology: Serving Our Global Community".*

## ***How is NASA Involved?***

NASA technology spinoffs will be used as an overarching theme behind the NASA's GSTW interactive experiences for students, educators, parents, and interested citizens to discover and explore ways in which NASA technology touches their lives in the areas of communication, food- nutrition, health-medicine, remote sensing, and transportation.
